

## Suggested Cisco Phone Vendors

Please note that Telecommunications does not endorse one vendor over another. However, the vendors listed below are currently used by Telecommunications.

### New Phones-

Netsync Network Solutions	Leo Kamenker	<a href="mailto:lkamenker@netsyncnetwork.com">lkamenker@netsyncnetwork.com</a>	713-218-5052
	David Monasmith	<a href="mailto:DMonasmith@netsyncnetwork.com">DMonasmith@netsyncnetwork.com</a>	
Sirius Computer Solutions	Austin Atkins	<a href="mailto:austin.atkins@cdwg.com">austin.atkins@cdwg.com</a>	312-705-0177

\*Amazon or similar sites are also an option, especially for smaller phone orders. \*Be sure to pay attention to the model SKU offered by the vendors as Cisco does offer 2 versions of each phone model, one for our on-campus system and another for third-party support (cloud and other vendor phone systems). Make sure you are only purchasing a phone model with the sku that matches exactly what we've listed to ensure there will be no compatibility issues.

### Previously Owned Phones-

PC Liquidations	Merrill Bryan	<a href="mailto:merrill.bryan@pcliqualidations.com">merrill.bryan@pcliqualidations.com</a>	904-800-3032
		<a href="https://www.pcliqualidations.com/p44680-cisco-8851-ip-gigabit">https://www.pcliqualidations.com/p44680-cisco-8851-ip-gigabit</a>	

### Current Supported Cisco Phone models.

CISCO: <a href="#">Cisco Options at a Glance</a> (clickable link) – Telecom Approved Models			
Phone Model #	Description	Accessories Model #	Description <b>*If you do not have PoE, you will need an IP Power Transformer</b>
