University-Wide

IT Governance Framework

Background

Texas A&M University currently utilizes a decentralized model for some IT spending and some decision-making. A University-wide IT Governance framework seeks to address IT issues that impact the entire University through a formalized mechanism for input and decision-making in a centralized fashion, while leveraging the autonomous benefits of a decentralized University IT environment.

IT Governance research was conducted in the preceding years to the development of this document. The current framework capitalizes on the most important elements of the previous research offered among the Information Technology Advisory Committee (ITAC), elements of good practices found in the Deloitte-based Texas A&M System IT Governance and Collaboration Framework, and the Texas A&M University System Internal Audit recommendations on IT Governance. External research elements included the Information Technology Infrastructure Library (ITIL) version 3, Control Objectives for Information Technology (COBIT) version 5, the framework for the Governance of Enterprise IT (GEIT), IT Governance by Weill and Ross, the Educause IT Governance aggregation of research, and a comparison against numerous Vision 2020 peer institutions.

Guiding Definition

IT Governance is the assurance that Information Technology aligns with the outcomes required by the University for successful fulfillment of its mission. It ensures that appropriate decision-making activities (prioritization and funding) are done in concert with the University’s strategic priorities, while taking into account input from a broad base of stakeholders.

Mission, Purpose, & Responsibilities

Mission Statement

Ensure holistic alignment of IT resources and services University-wide to support the mission of the university, while becoming more efficient and effective in the focus of attention and time on activities that achieve shared priorities in a decentralized organizational structure.
Purpose Statement

IT Governance at Texas A&M is the essential foundation for a shared IT vision that is agile and responsive. Allowing the entire university Information Technology community to unite on common goals that will serve the university, state, and the citizens of Texas.

Responsibilities

The responsibility of a shared IT vision belongs to all clients, decision-makers, and stewards of IT services across Texas A&M University. It is this shared responsibility that is reflected in the ITG framework, to facilitate a common, thoughtful consideration of the overall needs of the university community. ITG stewards the shared responsibility of the overall governance of IT initiatives across the Academic, Administrative, Research and Technical domains.

Values

We value the ability to be open to multiple perspectives, recognizing that the executive leaders of Texas A&M University drive IT’s overall effectiveness, and respect the uniqueness of the University’s organizational culture. As such, the five tenets that drive the confidence in IT Governance are: Transparency, Accountability, Collaboration, Stewardship, and Agility.

Value 1

*We value Transparency* by providing information about IT decisions to all stakeholders with clear information on the process for funding, decision-making and strategic dialogues with the appropriate stakeholders, at various levels of the university.

Value 2

*We value Accountability* by acknowledging that IT is accountable to the governing groups for IT decisions with the subsequent implementation and execution of decisions in a timely manner. Accountability is further exemplified by providing feedback, updates, and reports to all appropriate stakeholders regarding IT Governance outcomes.

Value 3

*We value Stewardship* through the assurance that IT leadership is efficiently and responsibly using IT resources in the best interest of the University, its stakeholders, and members of the extended Texas A&M community.

Value 4

*We value Collaboration* in dialogues and decision-making by ensuring that decisions are informed from multiple perspectives and increase teamwork via the implementation of projects across divisions for greater impact and utilization.
Value 5

*We value Agility* by facilitating the continual service improvement of the IT Governance framework through adaptation and adjustment to succeed in a rapidly changing, ambiguous, and dynamic environment of higher education.

### Objectives and Scope

The scope of ITG includes, at the broadest, an alignment of IT outcomes required by the University for successful fulfillment of its mission. ITG encompasses appropriate University-wide IT decision-making activities, IT policy and standards development, IT risk optimization, assurance of IT benefit and value realization, optimization of IT investment and resource management, and the alignment of IT strategy to the overall University mission and strategy.

**Objective 1**

Establish, maintain, communicate, and continuously improve a campus-wide IT vision that supports the Texas A&M University mission, goals, and outcomes.

**Objective 2**

Establish, maintain, adjust, report, and continuously re-align an IT investment management program through an IT budget structure for total IT expenditures University-wide, with primary focus on the CIO’s IT organization(s).

**Objective 3**

Establish, maintain, communicate, and continuously improve IT policies, technical architectures, and technical standards that support strategic, University-wide IT priorities.

**Objective 4**

Set the direction, exercise decision-making, and prioritize an IT portfolio of University-wide services, programs, and projects for the purpose of aligning IT investment to the University mission and requirements of stakeholder groups.

**Objective 5**

Enable the utilization and optimization of IT services, programs, and projects for the Teaching, Research, and Learning technology related initiatives at the University-wide level.

**Objective 6**

Facilitate a formal input structure from a diverse body of stakeholders University-wide on the performance and utilization of existing IT services, as well as the identification of new IT services.
IT Governance Mechanisms

An ITG domain is a distinct collection of decisions spanning across strategy, tactics, management, and policy. Each domain contains a number of processes, realized via decision and input structures. The ITG framework includes the Executive, Strategic, and Technical-Policy domains.

Executive Domain

Accountable for the overall evaluation, direction, and monitoring of the ITG framework. The Executive Domain ensures that IT enables and supports the achievement of the University mission and business objectives. This occurs through the integration of IT strategic plan(s) with the University strategic plan, alignment of IT services with University operations for the purpose of optimizing services and processes, and the optimal utilization of IT investments. The Executive Domain contains processes and structures that have final authority over IT operations and the associated management tiers.

Strategic Domain

Accountable for planning, building, running, and improving all aspects of the IT organization(s). The Strategic Domain ensures that IT creates optimal value (bundle of benefits less the actual costs as viewed by the consumer of an IT service or resource) by delivering the services and resources necessary to enable the fulfillment of the University mission and business objectives. The Strategic Domain contains processes and structures that provide input and make recommendations that are ultimately approved by the Executive Domain, with the exception of Operational and Managerial decisions.

Technical-Policy Domain

Accountable for the alignment and development of relevant standards and procedures necessary to identify, evaluate, analyze, mitigate, manage, monitor, and communicate IT-related risk, policy, and architecture as an integral part of the University-wide ITG framework. The Technical-Policy Domain ensures that IT builds, maintains, and/or replaces IT architectural plans, applications, infrastructure, policies, procedures, and risk management activities according to the Executive Domain risk appetite and tolerance thresholds. The Technical-Policy domain has an overlapping relationship with the Strategic Domain, as inputs and outputs between the two domains will be both common and expected. This domain is distinct from the Strategic Domain in that it is responsible for the specialized technical analysis of topics that lead to recommendations, plans, and policies that are not included in the scope of the Strategic Domain.
Complete Component Model

Simplified Component Model
Decision-Making Structures

Decision-making structures are organizational units and roles responsible for receiving input from University stakeholders and making decisions within a defined scope. This section contains each decision-making structure in the ITG Framework, recognize inputs and outputs between the structures, outline alignment processes to ensure that behaviors are consistent with IT policy, and draw unique boundaries between the structures and their associated sub-structures.

The decision-making structures recognized in the Component Model include only the Council (Maroon) and Committees (Blue). Solid lines indicate a formal ITG relationship expressed through specific scope and interaction outlined in this document. Dotted lines indicate a relationship with informal inputs/outputs that are not specifically addressed in this document, yet, are recognized to exist and impact the overall operation of the ITG structure. Structures outside of the component model diagram may be grafted or voiced into the ITG framework as part of the ancillary input groups domain. The Strategic IT Committee (SITC) serves as the authoritative body for recognizing input groups and will maintain a process for request/acknowledgment into the framework.

Outside of formal input bodies, any student, faculty, or staff member (University stakeholders) may submit issues or topics for review by the IT Governance committees. University stakeholders should route these requests through their respective governance body (e.g. undergraduate students to student government association, faculty to faculty senate, staff to university staff council, IT professionals to IT strategic liaisons, etc.). The Strategic IT Committee contains representatives from recognized advisory bodies that will tender issues or topics received and the IT Strategic Liaisons are comprised of IT professionals who interact with the Vice President for IT and CIO.

It is important to highlight that IT decisions will occur outside of the governance model with respect to management. Management plans, builds, runs, and monitors activities in alignment with the direction set by the governance model to achieve University objectives. Whereas governance ensures that stakeholder needs, conditions and options are evaluated to determine balanced, agreed-on University objectives to be achieved; setting direction through prioritization and strategic decision-making; and monitoring performance and compliance against agreed-on direction and objectives.

Structural Definitions

IT Council

An IT council is the highest governing body in the ITG framework and is ultimately accountable for IT principles, investment, and strategy. An IT council is defined as a group of executive-level University stakeholders who convene on a periodic basis to make decisions, receive input, consult other governance bodies, or deliberate on an IT topic of interest within a given domain on a continual basis.

IT Committee

An IT committee is a deliberative assembly that serves various functions around a University IT service, topic, outcome, or stakeholder group on a continual basis. Committees may report to an ITG committee, but are not
required to do so in order to maintain existence unless expressly defined by the ITG framework. An IT committee recognized by the ITG framework is required to maintain an approved charter, elect a chairperson, utilize a consistent membership structure, and conduct periodic communications. A committee may invite input from another committee on an ad-hoc or routine basis. A committee within the ITG framework holds decision rights to a University IT service, topic, outcome, or stakeholder group at the University-Wide level unless the topic is within the domain of the Executive IT Council. A committee may form one or more sub-committees and receive input and presentations from those sub-committees or any University stakeholder by invitation. Existing IT committees across the University that wish to become a recognized IT committee and report into the ITG framework must receive approval by the Executive IT Council.

IT Sub-Committee

An IT sub-committee is a deliberative assembly that serves a specific IT committee. Sub-committees are typically continual in nature, but may be disbanded at the discretion of its parent committee. Sub-committees offer input and recommendations to their parent committee, but not directly to committees unless expressly authorized to do so by the parent committee. A sub-committee does not hold decision or funding rights to a University IT service, topic, outcome, or stakeholder group at the University-wide level. A sub-committee is not required to maintain a charter unless directed to do so by the respective parent committee.

IT Advisory Body

An IT Advisory Body exists as either a chartered or un-chartered group of individuals whose purpose is to represent the voice of a stakeholder group holistically without regard to a specific topic or issue. A chartered advisory body example could include the Faculty Senate or Student Government Association. These groups are intended to represent the collective interests of their constituents and actively lobby through informal or formal mechanisms for results that positively meet their interests. An unchartered advisory body example could include a group of IT Directors from across the University who meet with the CIO for the purpose of advising on technical or operational topics of interest that are within the IT domain. Such a group would not require a charter and would meet on a recurring basis. Bodies of this nature may serve as an input to the ITG framework without the need for formal recognition as an input source, as it is within the purview of the CIO to consult such groups within the course of their professional duties or obligations.

IT Special Advisory Body

An IT Special Advisory Body exists as a chartered group of individuals whose purpose is to complete special tasks and initiatives at the request of the Vice President for IT and CIO. This body is similar in purpose to an IT Task Force, however, it will endure indefinitely as opposed to a specific assignment that starts and ends. An IT Special Advisory body does not serve as a direct input into an ITG committee, acting as a stand-alone resource for the CIO. A component of the former Information Technology Advisory Committee will be charged as a Special Advisory Body. Descriptive information is available in Addendum 1.

IT Task Force

IT Task Forces are IT work groups typically comprising experts in a specified area of knowledge or practice in combination with the appropriate stakeholders. Task forces are small groups of people and resources brought together to accomplish a specific objective, with the expectation that the group will disband when the objective
has been completed. An IT Council or Committee may create a task force and implement the appropriate controls for the endeavor with an expectation of dissolution at the fulfillment of the task force objective.

**IT Community of Practice**

IT Communities of Practice (ITCoPs) complete the work of addressing priorities outlined by an IT Council or IT Committee(s) and appoint a leader or leadership group who can foster participation, establish a charge, and develop clear success criteria. ITCoPs are collaborative, University-wide communities of professionals dedicated to supporting one another and elevating a given service, topic, outcome, or stakeholder group on a continual basis. ITCoPs are self-managing and gather individuals around a specific topic that is expected to be enduring, though may be disbanded when the topic is no longer relevant due to technology changes or incorporation into the ITG framework. All University students, faculty and staff are welcome to participate in the ITCoPs unless prohibited by an ITCoP charter. ITCoPs do not hold decision or input rights in the ITG Framework and are required to interact with a Committee or Council to voice input or tender recommendations. An ITCoP example is the recent GoWeb initiative intended to enable collaboration of communication professionals across the University. A component of the former Information Technology Advisory Committee will be charged as an IT Community of Practice.

**IT Stakeholder Steering Group**

An IT Stakeholder Steering Group (ITSsG) serves as a representative stakeholder group that works with IT project teams to determine the best course of action and to provide accountability for IT projects at the University. ITSsGs aid project teams in developing a project charter that directs the project towards key requirements needed most from the service, create effective communication plan(s) to distribute information to affected stakeholders across the University, refine the project plan, research about the project or service at the University and peer institutions, and deliver the projects and services that the University truly needs.

ITSsGs serve as a project management resource for University-wide initiatives and may be formed by an IT committee. An ITSsG should contain the project manager for the respective initiative with an appropriate representation of stakeholders for the initiative. At the discretion of an IT committee structure, an ITSsG may evolve into a committee or sub-committee once the project transitions into operations.
Decision-Making Council and Committees

Executive IT Council

The University-wide Executive IT Council (EITC, “the Council”) approves the University-wide IT vision and overall IT budget structure, sets key IT priorities for the University, endorses IT principles, policies, and standards, resolves University-wide strategic IT issues, and establishes accountability for enacting decisions. The council consists of executive-level positions from across the University, to include the President, Provost, Chief Financial Officer (CFO), and Chief Information Officer (CIO). The EITC is the definitive decision-making body for IT, ensuring IT alignment with the central mission of the University. The decision-making members of the EITC are the President and Provost, where the President has final authority in decision-making.

Council Charge
The Council receives formal, periodic recommendations and input from the CIO and the Strategic IT Committee.

All ITG Framework committees receive, as inputs, any output of the EITC through a decision, directive, or other approved output mechanism. Such outputs will first route through the CIO or Strategic IT Committee (SITC).

Policy, Decisions, and Exception Facilitation

The Council has the authority to enact policy, execute decisions, and offer exceptions that supercede any ITG committee outcome. The Council may request recommendations, inputs, or any action by an ITG Council.

Membership

Permanent Voting Members (Decision-Making)
University President and Chief Executive Officer
University Provost and Executive Vice President, Chief Academic Officer

Permanent Attending Members
Vice President for IT and Chief Information Officer, Co-Chair
Executive VP for Finance & Administration and Chief Financial Officer (CFO)

Ex-Officio Member
Vice President for Enrollment and Academic Services

Meeting Procedures

Meeting frequency. Two times per fiscal year on the 2nd Wednesday during March and October. The Council will determine modifications to the meeting schedule as needed based on current activities.

Time Commitment. In addition to the scheduled meetings, members can expect to spend time between meetings reviewing related material and handling more routine matters via electronic methods utilized for decision-making.
Meeting structure. The Office of the CIO will collect agenda items.

Reporting. The Office of the CIO will report on decisions and maintain electronic communication mediums for distributing University-wide information on EITC in a method that aligns with the ITG values of transparency, accountability, stewardship, collaboration, and agility.

Documentation of proceedings. All meetings will have minutes of discussions, decisions, and action items that are published within 2 weeks of the proceeding.

Decision-Making. The President and Provost shall execute decisions for the Council, with all members offering input to items that are raised to a decision. The President has the final authority in the decision process.

Research and Supplemental Input Mechanisms. The council may establish, at its discretion, additional ad hoc committees, task forces, ITCoPs, ITSSGs, or other bodies as needed. Alternatively, the council may charge the CIO or the SITC with the establishment of an ITG body.

Council Support. The Office of the CIO will provide administrative support in conjunction with the Office of the President.
Strategic IT Committee

Accountable and transparent to the Texas A&M University community, the Strategic IT Committee (SITC) advises and executes decisions on IT strategies, investments, operations, priorities and services.

The SITC is the direct input body to the EITC among the ITG framework. While overall strategies and priorities are set by the EITC, the SITC defines and recommends approaches to key IT issues requiring decisions. The SITC requests the other ITG framework committees to take the lead in exploring new IT opportunities, resolving IT issues and recommending courses of action. The SITC may launch special-interest task forces to address and make recommendations on issues that span all ITG committees. The SITC governs IT policy, funding for new University-wide IT services, major projects or IT initiatives, as well as replacement or retirement of IT services and functions. Project priorities, initiative management, and forecasting IT service needs are all important responsibilities of the SITC.

Each committee in the ITG framework is responsible for identifying and drafting IT policies relative to their scope with the intention of routing to the Information Risk, Policy, and Security Committee (IRPSC). The SITC drafts IT policies that do not fit within the scope of the other ITG framework committees (e.g., it will route policies in draft status for review by the IRPSC before submission to the CIO).

Committee Charge

The SITC produces the following outputs, including, but not limited to:

- Recommendations, strategies, and special reports intended as an input to the EITC in the genre of:
  - University-wide IT Funding Strategies.
  - University-wide Policy that sets precedent as received by the IRPSC.
  - University-wide IT Strategic Plans.
  - University-wide IT Principles.
- Final decision on issues originating in the RITC, EAC, TTLTC, & AIC where EITC approval is not required.
- Recommendations on Information Risk, Policy, and Security to the IRPS committee.
- Requests to all other committees for the exploration of new IT opportunities, resolving IT issues and recommending courses of action related to the scope of a respective committee.
- Requests to all other ITG input bodies for presentations and reports on IT strategy, operations, plans, technical architecture, or policy matters from across the University.
- Requests to IT organizations across the University for presentation and reports on IT strategy, operations, plans, technical architecture, or policy matters from across the University.

The SITC receives the following inputs, including, but not limited to:

- Recommendations and decisions that are out of scope for the following committees:
  - Research and Innovation Technologies Committee (RITC)
  - Information Risk, Policy, and Security Committee (IRPSC)
  - Enterprise Applications Committee (EAC)
  - Teaching and Transformational Learning Technologies Committee (TTLTC)
  - Architecture & Infrastructure Committee (AIC)
● Any recognized ITG input body.

Policy, Decisions, and Exception Facilitation

The SITC has the authority to execute strategic, operational, planning, technical, and policy decisions, as well as offer exceptions to a decision from any other ITG committee.

Membership

Permanent Attending Members (Voting)
Vice President for IT and Chief Information Officer
Vice President for Enrollment and Academic Services
1 Council of Deans Representative
1 Faculty Senate Representative
2 Faculty Members (Appointed by the Provost)
1 Council of Principal Investigators (CPI) Representative
1 Student Government Association Representative
1 Graduate and Professional Student Council Representative
3 Campus Leaders (By appointment of the President)\(^1\)
1 Staff Council Representative
1 IT Professional (By appointment of the President for IT and CIO)
1 TAMU Galveston Representative\(^2\)
1 TAMU Qatar Representative\(^2\)

Ex-officio Members (Non-Voting)
Chairperson - Architecture & Infrastructure Committee (AIC)
Chairperson - Enterprise Applications Committee (EAC)
Chairperson - Information Risk, Policy, and Security Committee (IRPSC)
Chairperson - Research and Innovation Technologies Committee (RITC)
Chairperson - Teaching and Transformational Learning Technologies Committee (TTLTC)
Texas A&M IT - Executive Director & Deputy Chief Information Officer
Office of Budget and Planning - Associate Vice President Representative

Committee Membership

Chairperson. A chairperson shall be elected during the July meeting of each year, serving a one-year term that begins during the September SITC meeting. In the case of the initial implementation of the IT Governance framework, a chair shall be elected during the September meeting.

Member Terms. Each member shall serve a term of two years beginning in the month of August or September, depending upon scheduling, and ending in the month of May during the second year of membership, for a total attendance of seven meetings in addition to related SITC events that occur during the term. The Chairperson shall request up to three members for a second term to enable continuity of membership in the committee. The

\(^1\) One campus leader from among the Presidential appointments must be from the Health Sciences Center.

\(^2\) Selected representative from Texas A&M University – Galveston and Texas A&M University – Qatar must be a faculty member.
Vice President for Enrollment and Academic Services has a permanent voting member role. Supplemental term information is available in the Schedule of Terms table.

**Ex-Officio Members.** Each chairperson of the governance committees that report into the SITC shall serve as ex-officio members in the SITC to maintain alignment. The Office of Budget and Planning - Associate Vice President or Appointed Representative will attend as ex-officio, along the Texas A&M IT - Executive Director & Deputy Chief Information Officer (or related top-level financial leader role for the Texas A&M IT), due to the financial charge of the SITC.

### Meeting Procedures

**Meeting frequency.** A minimum of 4 meetings per year (up to 6 meetings where necessary) on the 2nd Wednesday of the month in February, May, August, and November. The committee will determine modifications to the meeting schedule as needed based on current activities. Meetings will be staggered to avoid conflict with other governance bodies.

**Time Commitment.** In addition to the scheduled meetings, members can expect to spend 5-7 hours between the quarterly meetings via correspondence methods reviewing related material and handling more routine matters via electronic methods utilized for decision-making. In order to operationally maintain a quarterly cadence, members are required to pre-read documents relating to issues prior to attending the meeting.

**Meeting structure.** The Office of the CIO will collect and confirm agenda items with the Co-Chairs, and circulate agendas in advance of each meeting to ensure informed discussion of scheduled topics. Staff will be available to aid in the facilitation and documentation of the meetings. Robert’s Rules of Order will be the parliamentary authority.

**Reporting.** The Office of the CIO will report on decisions and maintain electronic communication mediums for distributing University-wide information for the SITC.

**Documentation of proceedings.** All meetings will have minutes of discussions, decisions, and action items that are published within 2 weeks of the proceeding.

**Voting.** The chair (VP for IT & CIO) shall execute decisions for the committee, with all attending members offering input to items that are raised to a decision/vote. Attending members, with the exception of ex-officio members, will be “polled” for their position on items raised to a decision. The VP for IT & CIO has the final authority in the decision process. A quorum is not required for a meeting to proceed.

**Research and Supplemental Input Mechanisms.** The committee may establish, at its discretion, additional ad hoc committees, task forces, ITCoPs, or ITSSGs, as needed. Alternatively, the committee may charge any ITG committee with the establishment of a research mechanism.

**Committee Support.** The Office of the CIO will provide administrative support.
Teaching and Transformational Learning Technologies Committee

The Teaching and Transformational Learning Technologies Committee (TTLTC) provides input for the teaching and learning mission of Texas A&M University by reviewing, evaluating, and recommending strategies, plans, and policies regarding IT projects and services that support teaching and learning by faculty and students.

Committee Charge

The TTLTC produces the following outputs, including, but not limited to:

- Review and recommend teaching and transformational learning technology applications to the SITC. The TTLTC works in close partnership with the EAC to establish recommendations.
- Identify and evaluate University-wide teaching and transformational learning technology policy issues resulting in Standard Administrative Procedures or Executive Policy to the IRPSC for review, prior to submission to the CIO and/or the University Rule Team.
- Raise requests for funding University-wide teaching and transformational learning technology initiatives to the SITC for review. The SITC will then raise issues to EITC according to its scope.
- Develop recommendations for University-wide technologies to support the alignment of innovative and transformational initiatives that promote excellence in teaching and transformational learning technologies.
- The TTLTC is charged with making recommendations to the SITC regarding University-wide project and service priorities in the area of teaching and transformational learning technologies.
- Strategic planning covering technologies needed to support campus teaching and transformational learning technology activities. Strategic planning components are raised to the SITC, and then endorsed by the Executive IT Council.

The TTLTC votes and makes decisions within the above charge and scope. The TTLTC receives the following inputs, including, but not limited to:

- Recommendations and decisions that are out of scope for the following committees:
  - Information Risk, Policy, and Security Committee (IRPSC)
  - Architecture & Infrastructure Committee (AIC)
  - Research and Innovation Technologies Committee (RITC)
  - Enterprise Applications Committee (EAC)
- Any recognized ITG input body.
- Analysis activities and recommendations requested by any ITG committee.

The TTLTC will oversee committees, existing or developed, that serve as inputs to its overall scope. Active committees established prior to the University-wide IT Governance framework who wish to input or integrate into the TTLTC, require approval by the SITC to be recognized in the ITG framework.

New committees, task forces, IT Communities of Practice, or Stakeholder Steering Groups may be created by the TTLTC.
Policy, Decisions, and Exception Facilitation

Exceptions to TTLTC decisions will be raised to the SITC.

Membership

Permanent Voting Members (Voting)
Dean of Faculties for Faculty Development
2 Associate Deans (By appointment of the Provost)
5 Faculty Members (By appointment of the Provost)
1 Faculty Senate Representative
1 Undergraduate Student (By appointment of the Student Government Association)
1 Graduate Student (By appointment of the Graduate and Professional Student Council)

Ex-officio Members (Non-Voting)
Associate Provost for Undergraduate Studies Representative (By appointment of the Assc. Provost for Undergraduate Studies)
Instructional Media Services Representative (By appointment of the Vice President for Enrollment and Academic Services)
Instructional Technology Services Representative (By appointment of the Dean of Faculties)
IT Professional (By appointment of the VP for IT and CIO)

Committee Membership

Chairperson. A chairperson shall be elected during the July meeting of each year, serving a one-year term that begins during the September RITC meeting.

Member Terms. Each member shall serve a term of two years beginning in the month of September and ending in the month of July during the second year of membership, for a total attendance of twelve meetings in addition to related TTLTC events that occur during the term. The Chairperson shall request up to three members for a second term to enable continuity of experience in the committee. Supplemental term information is available in the Schedule of Terms table.

Ex-Officio Members. The Associate Provost for Undergraduate Studies shall appoint a representative to serve as an ex-officio member. The Assistant Vice President of Academic Services shall appoint a representative from Instructional Media Services to serve as an ex-officio member.

Meeting Procedures

Meeting frequency. Bi-monthly on the 1st Tuesday in January, March, May, July, September, and November. The committee will determine modifications to the meeting schedule as needed based on current activities. Meetings will be staggered to avoid conflict with other committees.

Time Commitment. In addition to the scheduled meetings, members can expect to spend 4-6 hours between the bi-monthly meetings via correspondence methods reviewing related material and handling more routine matters.
via electronic methods utilized for decision-making. In order to operationally maintain a bi-monthly cadence, members are required to pre-read documents relating to issues prior to attending the meeting.

Meeting structure. The Office of the CIO will collect and confirm agenda items with the Co-Chairs, and circulate agendas in advance of each meeting to ensure informed discussion of scheduled topics. Staff will be available to aid in the facilitation and documentation of the meetings. Robert’s Rules of Order will be the parliamentary authority.

Reporting. The Office of the CIO will report on decisions and maintain electronic communication mediums for distributing University-wide information for the TTLTC.

Documentation of proceedings. All meetings will have minutes of discussions, decisions, and action items that are published within 2 weeks of the proceeding.

Voting. Each permanent voting member shall have one vote counting toward a decision/vote, where a quorum of 6 is needed from within the 11 permanent attending members. The chairperson shall manage the voting process, which is determined by majority vote from within the count of voters. The chairperson shall decide a vote ending in a tied decision.

Research and Supplemental Input Mechanisms. The committee may establish, at its discretion, additional ad hoc committees, task forces, ITCoPs, or ITSsGs, as needed.

Committee Support. The Office of the CIO will provide administrative support.
Research and Innovation Technologies Committee

The Research and Innovation Technologies Committee (RITC) provides input for the research mission of Texas A&M University by reviewing, evaluating, and recommending strategies, plans, and policies regarding IT projects and services that support research by faculty and students. The committee solicits input from key stakeholders and constituencies across the campus to ensure that institutional needs are being met in regards to technologies needed to support campus research activities.

Committee Charge

The RITC will oversee committees, existing or developed, that serve as inputs to its overall scope. Active committees established prior to the University-wide IT Governance framework who wish to input or integrate into the RITC, require approval by the SITC to be recognized in the ITG framework.

New committees, task forces, IT Communities of Practice, or Stakeholder Steering Groups may be created by the RITC.

The RITC produces the following outputs, including, but not limited to:

- Review and recommend research technology applications to the SITC.
- Identify and evaluate University-wide research technology IT policy issues resulting in Standard Administrative Procedures or Executive Policy to the IRPSC for review, prior to submission to the CIO and/or the University Rule Team.
- Identify and evaluate University-wide research data management policy issues resulting in Standard Administrative Procedures or Executive Policy to the IRPSC for review, prior to submission to the CIO and/or the University Rule Team.
- Identify and evaluate University-wide data science technologies and infrastructure. Recommendations and request for analysis should be made to the AIC for such technologies.
- Raise requests for funding University-wide research computing initiatives to the SITC for review. The SITC will then execute decision or raise issues to EITC according to the request scope.
- Make recommendations to the SITC regarding University-wide project and service priorities in the area of research technologies.
- Strategic planning covering technologies needed to support campus research activities. Strategic planning components are raised to the SITC, and then endorsed by the Council where appropriate.
- Strategies to assist Principal Investigators (PIs) on existing and planned grant funding to support technology investments or potential technology investments.
- Recommendations to the IRPSC or SITC on the assurance of cybersecurity compliance as it relates to grant funding (e.g. Federal Acquisition Register, Defense Federal Acquisition Regulation Supplement, NIST 800-171, etc.) to enable the continuation or growth of federally funded grant programs.

The RITC votes and makes decisions within the above charge and scope. The RITC receives the following inputs, including, but not limited to:

- Recommendations and decisions that are out of scope for the following committees:
  - Strategic IT Committee (SITC)
  - Information Risk, Policy, and Security Committee (IRPSC)
  - Enterprise Applications Committee (EAC)
INFORMATION TECHNOLOGY GOVERNANCE WORKING GROUP
University – Wide IT Governance Framework

○ Teaching and Transformational Learning Technologies Committee (TTLTC)
○ Architecture & Infrastructure Committee (AIC)
  ● Any recognized ITG input body.
  ● Analysis activities and recommendations requested by any ITG body.

Policy, Decisions, and Exception Facilitation

Exceptions to RITC decisions will be raised to the SITC.

Membership

Permanent Voting Members (Voting)
1 CPI Member (By appointment of the CPI - Executive Committee)
1 University Research Council Member (By appointment of the Vice President for Research)³
1 Associate Dean (By appointment of the Provost)⁴
1 Vice President for Research IT Professional (By appointment of the Vice President for Research)
1 High-Performance Computing Representative (By appointment of the Vice President for Research)
1 Texas A&M IT Representative (By appointment of the Vice President for IT and CIO)
1 Executive Advisory Council on Core Facilities Representative
1 Center and Institute Directors Council (By appointment of the Senior Associate Vice President for Research)
4 Faculty Researchers (By appointment of the Provost)
Texas A&M IT - Chief Technology Officer

Ex-officio Members (Non-Voting)
Vice President for IT & Chief Information Officer

Committee Membership

Chairperson. A chairperson shall be elected during the July meeting of each year, serving a one-year term that begins during the September RITC meeting.

Member Terms. Each member shall serve a term of two years beginning in the month of September and ending in the month of July during the second year of membership, for a total attendance of twelve meetings in addition to related RITC events that occur during the term. The Chairperson shall request up to three members for a second term to enable continuity of experience in the committee. Supplemental term information is available in the Schedule of Terms table.

Ex-Officio Members. The Texas A&M IT - Chief Technology Officer shall serve as an ex-officio member to enable rich connection with the AIC.

Meeting Procedures

³ Appointment is not required to be a faculty member.
⁴ Administrative appointment, but considered as a faculty member.
Meeting frequency. Bi-monthly on the 2nd Tuesday in January, March, May, July, September, and November. The committee will determine modifications to the meeting schedule as needed based on current activities. Meetings will be staggered to avoid conflict with other committees.

Time Commitment. In addition to the scheduled meetings, members can expect to spend 4-6 hours between the bi-monthly meetings via correspondence methods reviewing related material and handling more routine matters via electronic methods utilized for decision-making. In order to operationally maintain a bi-monthly cadence, members are required to pre-read documents relating to issues prior to attending the meeting.

Meeting structure. The Office of the CIO will collect and confirm agenda items with the Co-Chairs, and circulate agendas in advance of each meeting to ensure informed discussion of scheduled topics. Staff will be available to aid in the facilitation and documentation of the meetings. Robert’s Rules of Order will be the parliamentary authority.

Reporting. The Office of the CIO will report on decisions and maintain electronic communication mediums for distributing University-wide information for the RITC.

Documentation of proceedings. All meetings will have minutes of discussions, decisions, and action items that are published within 2 weeks of the proceeding.

Voting. Each permanent voting member shall have one vote counting toward a decision/vote, where a quorum of 7 is needed from within the 13 permanent attending members. The chairperson shall manage the voting process, which is determined by majority vote from within the count of voters. The chairperson shall decide a vote ending in a tied decision.

Research and Supplemental Input Mechanisms. The committee may establish, at its discretion, additional ad hoc committees, task forces, ITCoPs, or ITSSGs, as needed.

Committee Support. The Office of the CIO will provide administrative support.
Information Risk, Policy, & Security Committee

The Information Risk, Policy, and Security Committee (IRPSC) provides the ITG framework with institutional governance of information risk. IRPSC is charged with providing oversight and support of Texas A&M University information security by authoring privacy-related policies, procedures, and security initiatives. The committee recommends strategic direction on campus information security and data privacy-related work to ensure that it supports the University mission. IRPSC works in close collaboration with the University Rule Team and Enterprise Risk Management Group within the Office of University Risk and Compliance.

Committee Charge

The IRPSC will oversee committees, existing or developed, that serve as inputs to its overall scope. Active committees established prior to the University-wide IT Governance framework who wish to input or integrate into the IRPSC, require approval by the SITC to be recognized in the ITG framework.

New committees, task forces, IT Communities of Practice, or Stakeholder Steering Groups may be created by the IRPSC.

The IRPSC produces the following outputs, including, but not limited to:

- Periodic review and monitoring of the campus information security and privacy programs to ensure adequate transparency on how personal information is protected, what data is collected about electronic activities of individuals, and how such data is used.
- Solicit input and comment through electronic communications channels for proposed standards from Information Resource Managers across the University prior to publication of proposed standards.
- Approval of privacy and information security policies and standards, including evaluation of risks as well as costs and benefits of mitigation, considering workload impact across campus. Following IRPSC approval, information security and privacy policies are referred to University Risk and Compliance for formal authorization where applicable.
- Propose new or modified standards/controls developed by the Texas A&M Risk Management and Policy personnel in the office of the Chief Information Security Officer.
- Monitor and direct continual service improvement efforts toward the Texas A&M University Control Catalog in alignment with NIST SP 800-53 Rev. 4 and Texas Administrative Code 202 (§202.76).
- Interpretation and application of Information Resource policy, and adjudication of conflicts between campus initiatives and regulatory compliance requirements.
- Escalation and/or approval of issues that do not conform to TAMU information security and privacy practices, e.g., vendor terms and conditions, contracts, and services incompatible with information resource policy.
- Recommend prioritization of resources and determination of campus response to address information risk situations.
- Authorization of protocols for handling information security and privacy policy exception requests, appeals, and escalations, e.g., thresholds for delegation to management.
- Handling of exception appeals and non-compliance regarding security standards and policy, including decisions on whether the presenting risk warrants removal of the non-compliant systems from the network or removal of institutional data from the non-compliant systems, and adoption and delegation of
procedures for handling common non-compliance issues that may be delegated to management processes.

- Develop continual service improvement outcomes to enhance the awareness and effectiveness of Information Risk, Policy, and Security topics across TAMU.

The IRPSC votes and makes decisions within the above charge and scope. The IRPSC receives the following inputs, including, but not limited to:

- Recommendations and decisions that are out of scope for the following committees:
  - Strategic IT Committee (SITC)
  - Architecture and Infrastructure Committee (AIC)
  - Research and Innovation Technologies Committee (RITC)
  - Teaching and Transformational Learning Technologies Committee (TTLTC)
  - Enterprise Applications Committee (EAC)

- Recommendations for the development of policy, procedure, or security actions from the following bodies:
  - Architecture and Infrastructure Committee (AIC)
  - Research Technologies Committee (RITC)
  - Teaching and Transformational Learning Technologies Committee (TTLTC)
  - Enterprise Applications Committee (EAC)
  - University Rules Team
  - Enterprise Risk Management Group

- Any recognized ITG input body.
- Analysis activities and recommendations requested by any ITG committee.

Policy, Decisions, and Exception Facilitation

The Vice President for IT acts with signature authority on all policy and control documents within the information resources domain prior to finalization with the Texas A&M University - Compliance Program.

The IRPSC reviews and decides on exception requests to information security controls and standard administrative procedures in the domain of information technology. Exceptions will be documented in a consistent format and stored in a secure document repository. The Texas A&M University - Chief Information Security Officer (CISO) acts as the final approving agent for exception requests reviewed by the IRPSC.

Membership

Permanent Voting Members
Texas A&M University - Chief Information Security Officer
1 Division of Student Affairs IT Representative (By appointment of the Vice President for Student Affairs)
1 Texas A&M IT Representative (By appointment of the Vice President for IT and CIO)
1 Vice President for Research Representative (By appointment of the Vice President for Research)
1 Academic Services IT Representative (By appointment of the Ascc. Vice President for Academic Services)
1 Division of Finance and Administration IT Representative (By appointment of the Vice President and CIO)
4 IT Representatives (By appointment of the VP for IT and CIO)
3 Faculty Members (By appointment of the Provost)
INFORMATION TECHNOLOGY GOVERNANCE WORKING GROUP

University – Wide IT Governance Framework

1 Texas A&M Health Science Center Representative (By appointment of the Vice President for IT and CIO)

Ex-officio Members
Texas A&M University Risk and Compliance Representative
Texas A&M University System Office of General Council Representative
Texas A&M IT - Associate Director for Security Operations
Texas A&M IT - Risk, Management and Policy Representative
Chairperson - Architecture & Infrastructure Committee
Chairperson - Enterprise Applications Committee

Committee Membership

Chairperson. A chairperson shall be elected during the July meeting of each year, serving a one-year term that begins during the September RITC meeting.

Member Terms. Each member shall serve a term of two years beginning in the month of September and ending in the month of July during the second year of membership, for a total attendance of twelve meetings in addition to related IRPSC events that occur during the term. The Chairperson shall request up to three members for a second term to enable continuity of experience in the committee. Supplemental term information is available in the Schedule of Terms table.

Ex-Officio Members. The Associate Vice President for University Risk and Compliance shall appoint a University Risk and Compliance representative to serve as an ex-officio member. The Texas A&M IT - Associate Director for Security Operations, along with the Chairpersons of the Architecture & Infrastructure Committee and Enterprise Applications Committees, shall serve as an ex-officio members. The CISO shall appoint a Texas A&M IT - Risk, Management and Policy representative.

Meeting Procedures

Meeting frequency. Bi-monthly on the 3rd Tuesday in January, March, May, July, September, and November. The committee will determine modifications to the meeting schedule as needed based on current activities.

Time Commitment. In addition to the scheduled meetings, members can expect to spend 6-8 hours between the bi-monthly meetings via correspondence methods reviewing related material and handling more routine matters via electronic methods utilized for decision-making. In order to operationally maintain a bi-monthly cadence, members are required to pre-read documents relating to issues prior to attending the meeting. A process for endorsing University Rules will be created to meet University Risk and Compliance policy review schedules without delaying until an IRPSC meeting.

Meeting structure. The Office of the CIO will collect and confirm agenda items with the Co-Chairs, and circulate agendas in advance of each meeting to ensure informed discussion of scheduled topics. Staff will be available to aid in the facilitation and documentation of the meetings. Robert’s Rules of Order will be the parliamentary authority.

Reporting. The Office of the CIO will report on decisions and maintain electronic communication mediums for distributing University-wide information for the IRPSC.
Documentation of proceedings. All meetings will have minutes of discussions, decisions, and action items that are published within 2 weeks of the proceeding.

Voting. Each permanent attending member shall have one vote counting toward a decision/vote, where a quorum of 7 is needed from within the 14 permanent attending members. The Vice President for IT and CIO shall have final authority in the endorsement of an IRPSC decision/vote.

Research and Supplemental Input Mechanisms. The committee may establish, at its discretion, additional ad hoc committees, task forces, ITCopS, or ITSSGs, as needed.

Committee Support. The Office of the CIO will provide administrative support.
Enterprise Applications Committee

The Enterprise Applications Committee (EAC) provides strategic oversight for core administrative information systems across the University. The EAC seeks to align enterprise information technology systems based on the prioritized business needs of the university in order to reduce cost, facilitate innovation, and promote efficient communication. They ensure and review the effectiveness of University-wide applications and institutional data management, while promoting compliance and information technology standards.

The EAC ensures that the diverse stakeholder needs of the University are recognized through the assurance that plans and recommendations are evaluated against the impact on the University’s mission, strategic goals, and objectives. This committee increases the role of the existing Enterprise Information Executive Committee, in role and scope, while maintaining student information system oversight as well as other mission critical systems affecting the University as a whole.

An enterprise application or system is robust, scalable, and available to all Texas A&M University stakeholder groups collectively or by group (e.g. faculty, researchers, administrators, staff, undergraduate students, graduate students, etc.). The funding method utilized by the Strategic IT Committee (SITC) is not used to pre-determine which application or system is considered to be enterprise. The EAC, at the SITC’s approval, will manage an active list of systems and applications within IT Governance operations that are recognized as “enterprise.”

Committee Charge

The EAC will oversee committees, existing or developed, that serve as inputs to its overall scope. Active committees established prior to the University-wide IT Governance framework who wish to input or integrate into the EAC, require approval by the SITC to be recognized in the ITG framework.

New committees, task forces, IT Communities of Practice, or Stakeholder Steering Groups may be created by the EAC.

The EAC produces the following outputs, including, but not limited to:

- Identify and prioritize technology-based solutions for University-wide IT service needs (outside of Research, Teaching, and Learning), set priorities, and ensures coordination on the effective use of information technology resources to meet the operational needs of the University.
- Optimize the design, delivery, operation, and sourcing of University-wide IT services, including shared services and commodity services.
- Conduct an annual review of the overall Texas A&M University IT Service Portfolio and provide recommendations to the SITC for adding, changing, and removing services with recommended changes in investment levels.
- Assess University-wide application and institutional data needs and make operational, planning, and technical recommendations for stakeholder groups (i.e., faculty, researchers, students and staff.)
- Evaluate potential University-wide and institutional data systems projects against the impact on the University’s mission and strategic goals and objectives, generating recommendations as an output to the SITC.
- Creating a shared understanding between University stakeholders and IT service providers regarding the onetime (project) and ongoing (system lifecycle) resource implications for University resources of new systems investment.
● Evaluate the impact of proposed University and institutional data systems, infrastructure, and applications to existing resources with corollary recommendations for the retirement of existing services from a business impact perspective.
● Develop, implement, maintain and promote University-wide data management policies, standards, guidelines, and operating procedures related to University Institutional Data assets (as approved by the IRPSC).
● Advise on University-wide strategic plans for data management including sourcing, distribution, maintenance, and quality of University Institutional Data assets.
● Advise on University-wide data management practices for decision making including data warehousing, business intelligence, master data management, and metadata management.
● Recommend plans and methods for assessing data management value and risk.
● Assist in enhancing Institutional Data with consistent definitions and classifications according to data management standards and guidelines.

The EAC votes and makes decisions within the above charge and scope. The EAC receives the following inputs, including, but not limited to:

● Recommendations and decisions that are out of scope for the following committees:
  ○ Strategic IT Committee (SITC)
  ○ Architecture and Infrastructure Committee (AIC)
  ○ Research and Innovation Technologies Committee (RITC)
  ○ Teaching and Transformational Learning Technologies Committee (TTLTC)
  ○ Information Risk, Policy, & Security Committee (IRPSC)
● Any recognized ITG input body.
● Analysis activities and recommendations requested by any ITG committee.

Policy, Decisions, and Exception Facilitation

The EAC transitions risk, policy, and security issues to the IRPSC identified through the course of its scope. All other exceptions are raised to the SITC.

Committee Membership

Chairperson. A chairperson shall be elected during the July meeting of each year, serving a one-year term that begins during the September RITC meeting.

Member Terms. Each member shall serve a term of two years beginning in the month of September and ending in the month of July during the second year of membership, for a total attendance of twelve meetings in addition to related EAC events that occur during the term. The Chairperson shall request up to three members for a second term to enable continuity of experience in the committee. Supplemental term information is available in the Schedule of Terms table.

Ex-Officio Members. The Chairperson - Research and Innovation Technologies Committee, Chairperson - Teaching and Transformational Learning Technologies Committee, Director of Instructional Technology Services, and Director of Enterprise Information Systems shall serve as ex-officio members.
Membership

Permanent Members (Voting)
Assistant Vice President of Academic IT Services
Texas A&M IT - Chief Technology Officer
1 Division of Finance & Administration Representative (By appointment of the VP & Chief Financial Officer)
1 Texas A&M IT Representative (By appointment of the VP for IT and CIO)
2 Academic Services Representatives (By appointment of the Ascc. Vice President for Academic Services)
2 IT Representatives (By appointment of the VP for IT and CIO)
1 Division of Student Affairs Representative (By appointment of the Vice President for Student Affairs)
1 Faculty Senate Representative (By appointment of the Faculty Senate)
1 Faculty Member (By appointment of the Provost)
1 Student Government Representative (By appointment of the SGA President)
1 Graduate & Professional Student Council Representative (By appointment of the GPSC President)
1 Undergraduate or Graduate Student (By appointment of the Vice President for Student Affairs)
1 Division of Research Representative (By appointment of the Vice President for Research)

Ex-officio Members (Non-Voting)
Chairperson - Research Technologies Committee
Chairperson - Teaching and Transformational Learning Technologies Committee
Director - Instructional Technology Services
Director - Enterprise Information Systems

Meeting Procedures

Meeting frequency. Bi-monthly on the 4th Tuesday in January, March, May, July, September, and November. The committee will determine modifications to the meeting schedule as needed based on current activities.

Time Commitment. In addition to the scheduled meetings, members can expect to spend 4-6 hours between the monthly meetings via correspondence methods reviewing related material and handling more routine matters via electronic methods utilized for decision-making.

Meeting structure. The Office of the CIO will collect and confirm agenda items with the Co-Chairs, and circulate agendas in advance of each meeting to ensure informed discussion of scheduled topics. Staff will be available to aid in the facilitation and documentation of the meetings. Robert’s Rules of Order will be the parliamentary authority.

Reporting. The Office of the CIO will report on decisions and maintain electronic communication mediums for distributing University-wide information for the EAC.

Documentation of proceedings. All meetings will have minutes of discussions, decisions, and action items that are published within 2 weeks of the proceeding.

Voting. Each voting member shall have one vote counting toward a decision/vote, where a quorum of 8 is needed from within the 15 voting members. The chairperson shall have authority in deciding tied or failed vote/decisions.
Research and Supplemental Input Mechanisms. The committee may establish, at its discretion, additional ad hoc committees, task forces, ITCoPs, or ITSsGs, as needed.

Committee Support. The Office of the CIO will provide administrative support.
Architecture & Infrastructure Committee

The IT Architecture & Infrastructure Committee (AIC) provides input, recommendations, and architected solutions on IT infrastructure service types including the data and voice network, email, calendar and productivity tools, as well as IT infrastructure services provided at scale, such as networking, database, data center colocation, identity management, storage services, backup services, web applications, and hardware services.

Committee Charge

The AIC will oversee committees, existing or developed, that serve as inputs to its overall scope. Active committees established prior to the University-wide IT Governance framework who wish to input or integrate into the AIC, require approval by the SITC to be recognized in the ITG framework.

New committees, task forces, IT Communities of Practice, or Stakeholder Steering Groups may be created by the AIC.

The AIC produces the following outputs, including, but not limited to:

- Develop technical architectures or recommendations as prioritized by the SITC to ensure resource optimization and strategic alignment.
- Optimize the design, delivery, operation, and sourcing of University-wide IT service architectures and development of fulfillment strategies or plans to be analyzed by other ITG committees and the SITC.
- Conduct an annual review of the overall Texas A&M University IT Service Portfolio and provide recommendations to the SITC for adding, changing, and removing services with recommended changes in technical architectures and solutions.
- Develop recommendations and technical architectures for technologies as requested by the RITC, EAC, and TTLTC.
- Initiate recommendations for new or changed technical architectures or technologies during the normal course of committee function.
- Evaluate, develop, and maintain technical standards for University-wide application program interfaces and protocols in partnership with the EAC.
- Inform the SITC about existing or potential operational or technical issues as a result of new or existing technical architectures and escalate issues as appropriate.
- Evaluate the impact of proposed University and institutional data systems, infrastructure, and applications to existing resources with corollary recommendations for the retirement of existing services from a technical architecture perspective with related solutions.

The AIC votes and makes decisions within the above charge and scope. The AIC receives the following inputs, including, but not limited to:

- Recommendations and decisions that are out of scope for the following committees:
  - Research and Innovation Technologies Committee (RITC)
  - Information Risk, Policy, and Security Committee (IRPSC)
  - Enterprise Applications Committee (EAC)
  - Teaching and Transformational Learning Technologies Committee (TTLTC)
● Any recognized ITG input body.
● Analysis activities and recommendations requested by any ITG Committee.

Policy, Decisions, and Exception Facilitation

The AIC transitions risk, policy, and security issues to the IRPSC identified through the course of its scope. All other exceptions are raised to the SITC.

Membership

Permanent Members (Voting)
Texas A&M IT - Chief Technology Officer (Chairperson)
1 Texas A&M IT Representative (By appointment of the CTO)
1 Academic Services IT Representative (By appointment of the Vice President for Enrollment & Acad. Srvcs.)
5 IT Professionals (By appointment of the Vice President for IT and CIO)
1 Division of Finance and Administration IT Representative (By appointment of the Vice President and CFO)
1 Vice President for Research Representative (By appointment of the Vice President for Research)
1 Division of Student Affairs IT Representative (By appointment of the Vice President for Student Affairs)
1 Faculty Member (By appointment of the Provost)

Ex-officio Members (Non-Voting)
Chairperson - Enterprise Applications Committee
Texas A&M IT - Associate Director for Networking
Texas A&M IT - Chief Systems Engineer (or Designee)

Committee Membership

Chairperson. The Texas A&M IT - Chief Technology Officer serves as the chairperson for the AIC.

Member Terms. Each member shall serve a term of two years beginning in the month of September, and ending in the month of August (depending upon scheduling) during the second year of membership, for a total attendance of 24 meetings in addition to related AIC events that occur during the term. The Chairperson shall request up to five members for a second term to enable continuity of membership in the committee. Supplemental term information is available in the Schedule of Terms table.

Ex-Officio Members. The Chairperson - Enterprise Applications Committee, Texas A&M IT - Associate Director for Networking, and the Texas A&M IT - Chief Systems Engineer (or Designee) shall serve as ex-officio members for the AIC.

Meeting Procedures

Meeting frequency. Monthly on the 2nd Thursday of all calendar months. Cadence is monthly as opposed to bi-monthly due to the extended scope and rich technical solution initiation and development nature. The committee will determine modifications to the meeting schedule as needed based on current activities and may elect to cancel up to 2 meetings per year, particularly near the holiday break or mid-summer term.
**Time Commitment.** In addition to the scheduled meetings, members can expect to spend 3-4 hours between the monthly meetings via correspondence methods reviewing related material, developing architectures or solutions, and handling more routine matters via electronic methods utilized for decision-making.

**Meeting Structure.** The Office of the CIO will collect and confirm agenda items with the Co-Chairs, and circulate agendas in advance of each meeting to ensure informed discussion of scheduled topics. Staff will be available to aid in the facilitation and documentation of the meetings. Robert’s Rules of Order will be the parliamentary authority.

**Reporting.** The Office of the CIO will report on decisions and maintain electronic communication mediums for distributing University-wide information for the AIC.

**Documentation of Proceedings.** All meetings will have minutes of discussions, decisions, and action items that are published within 2 weeks of the proceeding.

**Voting.** Each voting member shall have one vote counting toward a decision/vote, where a quorum of 6 is needed from within the 12 voting members. The Chief Technology Officer shall have authority in deciding tied or failed vote/decisions.

**Research and Supplemental Input Mechanisms.** The committee may establish, at its discretion, additional ad hoc committees, task forces, ITCoPs, or ITSsGs, as needed.

**Committee Support.** The Office of the CIO will provide administrative support.
Alignment Processes

Agenda Setting

For long-term, strategic alignment, the development of an IT Strategic Plan that guides University-wide technologies toward alignment with the University mission and direction of the President will be necessary for success. Such a strategic plan would be renewed yearly to ensure an “evergreen” approach that maintains the relevance and accuracy of the plan. The ITG framework coordinator would then meet with committee chairs to aid in setting the agenda for the meetings using required outcomes from the strategic plan. A consolidated list of agenda topics, committee research activities, and active projects as a result of the committees will be managed in a portfolio. The Executive IT Council and the CIO will prioritize the portfolio and communicate the prioritization to the University community.

Chairpersons will coordinate regularly and select agenda topics using the list of strategic plan outcomes. The portfolio of governance activities, in addition to previously noted input methods, will be monitored and controlled to ensure continual strategic alignment.

Reporting

Agendas, presentation briefs, and notes for each regularly scheduled IT Governance meeting are available on the respective committee web pages. In addition to the meeting notes and executive summaries, IT Governance progress and updates are communicated via the CIO updates. All policy related materials are to be posted on the it.tamu.edu website or once finalized on rules.tamu.edu.

Suitable Discussion

Orientation will be needed to ensure people understand what is suitable to be brought forth into committee business as governance is generally about “what” IT should be doing as opposed to “how”, which is a management process. An orientation process will take place annually for new members with periodic communications sent to ITG framework participants covering topics that will educate their thinking to reduce managerial focus with a lens toward strategic imperatives.

Some examples to what are suitable discussions for IT Governance committees include:

- Discussion on large IT investments,
- architecture design,
- policy exception processes,
- major project updates and portfolio prioritization,
- and security control development.
Communication & Meeting Management

The Office of the CIO will coordinate communication activities and events to engage the University community on the outcomes of the ITG framework. Reports covering the effectiveness of the ITG framework will be generated on a periodic basis. A parliamentarian will be available at all IT Governance committee meetings, with the exception of the Council, to support the facilitation of the meeting utilizing Robert’s Rules of Order as the standard for parliamentary authority.

Schedule of Appointments

The following table provides an overview of the appointment schedule for ITG participants. The Office of the Vice President for IT and CIO will coordinate appointments across the respective University offices. The Vice President for IT and CIO will employ a practice of selecting College IT representatives from among the IT Professional and IT Leader appointments. These appointments will not be used for the Texas A&M IT organization, which have explicit representation among the other appointments.

Schedule of Terms

The following table provides an overview of the term schedule for ITG participants and the staggered terms necessary for continuity of the ITG framework during implementation. The Office of the Vice President for IT and CIO will coordinate terms in conjunction with appointments across the respective University offices.
