Information Technology

Satisfaction Survey

2020

The Texas A&M Division of Information Technology conducted a campuswide satisfaction survey February 3, 2020 to February 12, 2020. The survey committee consisted of Jon Griffey, Matthew Lacy, Scott Shepherd and Bobby Bernshausen.

Responses are anonymous. To increase participation, an iPad was given away in an optional, random drawing. The survey results of the contest entrants were still anonymous, since the main survey was conducted through Qualtrics and the contest through Google Forms.

Invitations and reminders were sent through the Maestro email system.

There were 6,002 survey participants, 4,044 of whom also entered the contest. The breakdown of participants was as follows: 58.03% were students, 25.71% staff, 10.88 students who are also staff members, and 5.38% faculty.

The following pages contain graphic representations of responses. The mean, standard deviation and variance of each are available on request.

All raw data can also be provided upon request.

Satisfaction Survey
Long-Form Answers
2020

The optional long-form answers were very expressive and opinionated. The top issues for each question were divided into categories and bar charts were used to also show the difference in the amount of overall responses received from faculty, staff and students. Just as reminder, there were 6,002 survey participants, 4,044 of whom also entered the contest. Overall survey breakdown of participants: 58.03% students, 25.71% staff, 10.88 students who are also staff members, and 5.38% faculty.

All raw data is available upon request.

How can we make the wireless network meet your expectations?

These responses were divided by the three key issues of speed, connection and coverage.

What cloud solution do you prefer?

In what building or area did you experience difficulty?

This question was for anyone who indicated they ever had Wi-Fi problems on campus. While answers included over 60 buildings, the top answers for each group of respondents are as follows:

Please explain your issues with Duo.

This question seemed to hit a nerve and had some very “candid” remarks. These were categorized and then broken down into the top responses.

Phone issues. This category includes a wide range of responses, including:

1. Dislike having to keep phone on me at all times
2. (Faculty) Don't want to use my personal phone for university business
3. Hinders work/studying when you have to stop to verify on phone
4. Difficult when changing phones or getting a new one
5. Causes problems if you forgot phone or battery dies

Numerous logins: This category includes responses such as:

1. Hate having to log in for almost every service (VPN, Howdy, CAS, etc.)
2. Shouldn't have to use Duo numerous times in a single session

Hassle:

1. Includes everything from just a pain to more descriptive terms.

“Remember Me”:

1. Many claimed the “Remember Me” function either doesn't work or doesn't last the entire 60 days.

Push:

1. Won't work
2. Times out

Waste of Time:

1. Doesn't seem necessary
2. Seems too redundant

Please tell us how we can improve our communications.

Answering this question was optional. Most of the feedback surrounded Operations Center, Statewide Client Services and Product Strategy & Communications groups. These answers were categorized and broken down into the top responses for each audience.
